

### Mounting on a wall (with an 86-type box)

Install the back cover on an 86-type box with two M 4 x 25 screws, and fixing the box on the wall with two ST 4 x 20 screws. If the box is not embedded in the wall completely, you could save two ST 4 x 20 screws depending on the situation.

- Adjust the length of the plastic bolt in the accessory box to make it suitable for installation.
- Fix the wired controller's bottom cover to the wall through the screw bar by using cross head screws. Make sure the bottom cover is set flush on the wall.

- Buckle the front cover, and fit the front cover to the back cover properly, leaving the wire unclamped during the installation.

### NOTE

To prevent water from entering the remote wired controller, use traps and plugs to seal the wire connections during wiring.
